

Id	Name	Pre-condition	STR	Expected result	Status	
1	Send request with valid data		1.Enter valid data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 OK is returned. The new resource is created.	passed	
Performance						
2	Check response time		1.Go to Scripts menu in Postman 2.Click Snippets 3.Find Response time is less than 200ms 4.Modify it to 2000ms 5.Send requests with this script 6.Check response "Test result"	Should be less than 2 seconds (You can create a test in Postman for that)	passed	
Status codes						
3	Check the response body for 422		1.Enter invalid data in body <pre>{ "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	The response body corresponds to the documentation.	passed	
4	Check the response body for 200		1.Enter valid data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	The response body corresponds to the documentation.	passed	
Body						
5	Send a request with a valid body		1.Enter valid data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	
First name validation						
6	Send 2 letters in the First name parameter		1.Enter data in request body <pre>{ "first_name": "An", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	

7	Send 32 letters in the First name parameter		1.Enter data in request body <pre>{ "first_name": "helwjvrgwngnjenvvanegneigneingei", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	
8	Send data with " ' " character in the name parameter		1.Enter data in request body <pre>{ "first_name": "Name'this", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	
9	Send data with only " ' " characters in the name parameter		1.Enter data in request body <pre>{ "first_name": "''''''''", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned	failed	
10	Send data with "- " character in the name parameter		1.Enter data in request body <pre>{ "first_name": "Anna-Maria", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	
11	Send data with only "- " characters in the name parameter		1.Enter data in request body <pre>{ "first_name": "-----", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned	failed	
12	Send incorrect data type (digit)		1.Enter data in request body <pre>{ "first_name": 123456, "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	

13	Send incorrect data type (boolean)		1.Enter data in request body <pre>{ "first_name": true, "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
14	Send incorrect data type (null)		1.Enter data in request body <pre>{ "first_name": NULL, "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
15	Send without this parameter		1.Enter data in request body <pre>{ "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
16	Send numbers in the name parameter		1.Enter data in request body <pre>{ "first_name": "12323", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
17	Send 1 letter in the name parameter		1.Enter data in request body <pre>{ "first_name": "a", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
18	Send 33 letters in the name parameter		1.Enter data in request body <pre>{ "first_name": "somerandomtexttotestboundaryvalues", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	

19	Send special characters in the name parameter		1.Enter data in request body <pre>{ "first_name": "!@#\$\$", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
20	Send space value in the name parameter		1.Enter data in request body <pre>{ "first_name": "some text", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
21	Send spaces at the beginning and end in the name parameter		1.Enter data in request body <pre>{ "first_name": " some ", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned. Field in the DB is created without spaces.	passed	
22	Send empty value in the name parameter		1.Enter data in request body <pre>{ "first_name": "", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
Last name validation						
23	Send 2 letters in the Last name parameter		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	
24	Send 32 letters in the Last name parameter		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "helwjrvgwngnjenvvvanegneigneingei", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	

25	Send data with " ' " character in the Last name parameter		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "Name'this", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	
26	Send data with only " ' " characters in the Last name parameter		1.Enter valid data in request body <pre>{ "first_name": "Andrii", "last_name": "''''''''''", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	failed	
27	Send data with "- " character in the Last name parameter		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "Anna-Maria", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	
28	Send data with only "- " characters in the Last name parameter		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "-----", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	failed	
29	Send incorrect data type (digit)		1.Enter valid data in request body <pre>{ "first_name": "Andrii", "last_name": "1242412", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
30	Send incorrect data type (boolean)		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": true, "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	

31	Send incorrect data type (null)		1.Enter valid data in request body <pre>{ "first_name": "Andrii", "last_name": null, "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
32	Send without this parameter		1.Enter data in request body <pre>{ "first_name": "Andrii", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed

65	Only letters		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwerty", "password_confirmation": "qwerty", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
66	Only digits		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "123456", "password_confirmation": "123456", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	

67	Only special characters		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "!@!@!@", "password_confirmation": "!@!@!@", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
68	Letters + digits but no special char		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123", "password_confirmation": "qwer123", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
69	Letters + special characters but no digit		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer@!", "password_confirmation": "qwer@!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
70	Digits + special characters but no letter		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "123!@!", "password_confirmation": "123!@!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
71	Send empty value in the password parameter		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": " ", "password_confirmation": " ", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
72	Send incorrect data type (digit)		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": 123456, "password_confirmation": 123456, "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	

73	Send incorrect data type (boolean)		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": false, "password_confirmation": false, "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
74	Send incorrect data type (null)		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": null, "password_confirmation": null, "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
75	Send without this parameter		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
Confirm Password validation						
76	Enter the same value as password value		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	200 is returned.	passed	
77	Enter the different value as the password value		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer13", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
78	Empty repeat password field		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	

79	Send incorrect data type (digit)		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": 1, "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
80	Send incorrect data type (boolean)		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": false, "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
81	Send incorrect data type (null)		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": null, "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
82	Send without this parameter		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "email": "{{\${randomEmail}}}", "password": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
General						
83	Send a request with an empty body		1.Enter data in request body <pre>{ }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	passed	
84	Send a request with a modified body (add more parameters or data)		1.Enter data in request body <pre>{ "first_name": "Andrii", "last_name": "te", "age": 32, "random_fact": "some info", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" }</pre> 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results	422 is returned.	failed	

			1.Enter data in request body { "first_name": "Andrii", "last_name": "te", "last_name": "te", "email": "{{\${randomEmail}}}", "email": "{{\${randomEmail}}}", "password": "qwer123!", "password_confirmation": "qwer123!", "i_agree": "1" } 2.Send POST https://stage.app.nolimit.school/api/signup 3.Check results			
85	Send a request with duplicate values in the request body			422 is returned.	failed	
DB						
86	Check created entity	Connected to database.	1.Copy id from response body from successful registration 2. Execute query select * from users where id=**** (where **** - id fromfrom step 1) 3.Check result	New record is created with all correct data	passed
